A NAVAL STATION

Harbor Front.

SITE SELECTED BY CAPT. TANNER

Some Wharf Plans of Local Gov ernment to Be Changed. Coaling-Repairs.

Capt. Tanner, U. S. N., the gentleman who gave out at San Francisco the contracts for improvement of Pago Pago harbor to the coaling station point, has been in Honolulu only a few days, but has been at work earnestly turing his short stay.

The mission of Capt. Tanner is to during his short stay.

prepare a coaling station in Honolulu harbor for the United States. There will be as well something of a supply depot here for the navy and in all likelihood quite extensive repair facilities will be provided.

Money is available for the purpose of providing naval necessities in the harbor here. Nothing can be done at Pearl Lochs until Congress has made a special appropriation for the dredging of the bar. Then the making of a ship entrance to the channel will require several months of time. It will probably be necessary to fetch a dredger from the United States, for the one owned by the Government here is in use or will be needed all the time

for the local harbor.

Capt. Tanner, since arrival, has been much in the company of Consul General Haywood. The two gentlemen yesterday called upon Capt. King, Ha-wailan Minister of the Interior, with a statement of desires which will later be reduced to writing.

to the Pacific Mail wharf. This dis-poses of a number of Government water lots, of the old King's boathouse and practically of the plan for the two slips upon which the dredger has been working for a year or more. It is possible that one of the slips will be allowed to remain in the harbor plans of the local administration, but even this is

The location of the United States Government coal sheds, on Richards street, in the vicinity of the new wareof Theo. H. Davies & Co., Ltd., is well known. It is in the new scheme for an American naval station here to greatly extend the coal storage space and for one thing to have such an arrangement that vessels with coal for the United States can discharge near the piles. Then it is considered that it will be as well to have such frontage arrangement that an American warship can come alongside a wharf in the immediate neighborhood of the coal storage and take on fuel without the

use of barges or lighters.

It is expected that inside of four to six months there will be afforded the waterfront sight of an American warship coaling alongside a wharf of the United States in Honolulu harbor. At present the United States is in distress for coal storage space here and will number of vacant lots along the front have been secured. Capt. Tanner is taking hold vigorously, in conjunction with the American consul and extensive arrangements will be made.

As there will be a large number of transports calling here for some years will be established, adding to the town a regular navy yard.

The appearance of the Oregon and Iowa here at this time will be an event in Island history. Both are fresh from the battle off Santiago where they, with the Texas, Brooklyn and little Gloucester, sunk the entire Spanish fleet. They are the biggest war vessels ever in Hawaiian waters and are among the most powerful fighting ma-thines of the world. If all goes well they should reach Honolulu about De-

LIEUT. GUSTAV ROSE.

Licut. Gus Rose, Company G. N. G. H., winner of the gold medal in the Foreign Office rifle contest, is a native Hawaiian. He is a clerk in the interior Office. The boys now call him "Sharpshooter Gus." In June Rose's score was 46, and in last Saturday's contest 48, as follows:

the individual prize, a gold medal, with a score of 48. As he has won this trophy in a majority of the contests it now becomes his property. The score made by Lieut. Rose, being with the milktary handleap and under the strain of match shooting. Is considered the record by local marksmen.

As a whole shooting was very poor. All of the teams fell from thirty to forty points below their usual figures. With Company G it was a case of fall down, B lost several points. Up to the eighteenth man D stood regularly from eight to twenty points ahead. Sergt, Klester, one of the best shots of the company, tried a straine gun, recorded five misses and closed with a score of 18. The nineteenth and inventieth man in D's team failed to show up and could not be found about town. Two new men were substituted, and made 23 and 27 respectively. Thus the team ahead almost to the last became the lowest at the finish.

Only eight Company F men showed up. It is said that this team thought the match had been postponed to Sunday morning on account of the reception at Meanalus.

Capt. John Kea, of Company G, was range officer and performed his duties to the entire satisfaction of all. Shooting legan at 2 and closed about 539. The hours stipulated in the orders were from 1.30 to, but the start was unavoidably late. As all the marksmen were at the range by 5 o'clock it was considered that the orders were complied with. The scores were as follows:

News From Home.

WASHINGTON: Sept. 23.-Representa-WASHINGTON: Sept. 22.—Representative Sherman, of New York, sent a telegram to the War Department today, saying that he had received reports that the First New York Infantry and other soldiers stationed at Honolulu were not sufficiently supplied with food and that the soldiers were in a starving condition. Telegrams were at once sent to Gen. Merriam at San Francisco asking him to report, at once on the food supply for the troops stationed at Honolulu. It is not believed that any such conditions exist, since otherwise Ges. Merriam would have so reported upon his arrival.

Poisoning Yourself?

You might make a single meal of rich pies and cakes, and not mind it. But you could not live on these all the time without ruining

your digestion.
Yet, week after week and month after month, you allow your brain and nerves to be fed with impure blood.
The general debility, thin blood, pale cheeks, nervousness, loss of appetite and depression of spirits, are loud warnings from nature. Your nervous system is weakening.
Before the ruin comes take
